

# RS232 Serial Interface

## RS-232 Serial Interface

Standard ASCII Based Commands, compatible with most touch screen serial drivers

**Two Way Serial Communication for Touch Screens and other Serial Devices**

## PRODUCT OVERVIEW

The Avi-on RS-232 Serial Interface provides a reliable, two-way serial **connection to touch-screen control units** or any device that needs to send or receive commands to/from the Avi-on Network using the Avi-on Serial ASCII Protocol.

The Avi-on Serial Protocol supports a wide range of external interface control actions, including:

### Send to the Avi-on Network:

Device/Group ON/OFF/Dim Level commands, Scene Triggers, Dimming Overrides, Avi-on Lockdown Mode triggers, and UL 924 Mode triggers.

### Receive from the Avi-on Network:

Device/Group dimming status updates, sensor trigger information, and Lockdown Mode enable/disable notifications.

Design custom touch-screen interfaces with ease by sending the appropriate serial commands from your preferred touch-screen or building control system.

The complete command set, along with sample integrations for common control systems—including Crestron and RTI—is provided in the installation guide.
