

Avi-on Quick Set-up Guide

1

Install Device

Hang and power fixtures, install and power sensors, install wall stations.

2

Download App

Download the Avi-on App from the App Store or Google play, Register, confirm your email and login. (Later, you will transfer this account to the property manager or owner).

3

Add Device(s)

If your devices were not already commissioned offsite, take the tour by swiping the screen from right to left, or select "Dismiss" then go to the Devices screen, press the "plus" symbol to add and setup all devices in the room or area.

4

Add Devices

Select one or more devices from the list, then hit "Add" to add the device(s) to the network. Repeat until all devices are added and named. The proximity feature will help identify nearby devices.

5

Name Device

Toggle the on/off light to identify the light fixture controlled by the activated switch. Press the edit icon to add a custom name and optional photo of the light fixture.

6

Create Groups

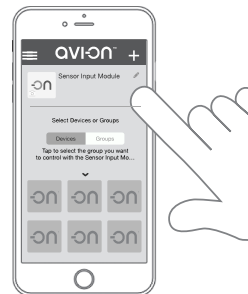

Next go to the Groups screen and create a group for each zone. Drag and drop the fixtures into the correct zones. Fixtures can be in multiple zones.

7

Create Schedules

Go to the Schedules screen and create schedules, then assign them to groups or individual devices.

8

Configure Sensors

Go to the Controllers screen, navigate to each sensor, choose the group you would like it to control, and set the timers and other settings

9

Configure Wall Stations

On the Controllers screen, select each wall station and configure the group it should control. Battery powered sensors require pushing the "OFF" button to wake the switch up to program.
